WORK EXPERIENCE

Depth Search

Frontend Developer

Aug 01 2025 - Present

- Worked as a Frontend Developer at Depth Search, building modern, responsive, and production-ready web interfaces using Next.js, React, TypeScript, and Tailwind CSS.
- Translating UI designs into clean, scalable components, integrating REST APIs, and handling asynchronous data flows were key responsibilities.
- Focused on performance, cross-browser compatibility, and maintainable code structure while collaborating with backend developers and designers in a remote environment.
- This experience strengthened my ability to work independently, solve real-world frontend challenges, and deliver high-quality features on time.

EDUCATION

Bogura Government Shah Shultan College

Bachelor of Political Science

Jan 2025 - Dec 2028

- Currently pursuing a Bachelor's degree in Political Science (1st Year), developing strong analytical, research, and critical thinking skills while balancing academic studies with practical experience in web development.

PROJECTS

Perfect AI

Sep 2025 - Dec 2025

- Perfect AI is a large-scale web platform that helps users discover, compare, and explore a wide range of AI tools in one place.
- Built using Next.js and TypeScript, the project focuses on performance, scalability, and a modern user experience.
- I worked as a Frontend Developer, where I developed responsive layouts, reusable UI components, smooth animations, and integrated API-driven data to ensure fast navigation and an intuitive browsing experience across all devices.

Synthera

Aug 2025 - Sep 2025

- Synthera is an AI-driven online shopping platform featuring role-based dashboards for Admin, Seller, and User, along with an intelligent chatbot for customer assistance.
- I contributed as a Frontend Developer, building dynamic dashboards, real-time product management, and responsive user interfaces.
- The platform allows users to browse products, manage carts, and interact with AI-powered features, delivering a smooth and engaging shopping experience.

SKILLS

- HTML5, CSS3, JavaScript (ES6+), and TypeScript
- Next.js and React.js
- Tailwind CSS and Bootstrap
- Node.js, Express.js, and MongoDB
- Git and GitHub
